BUSINESS YIELD CHECKLIST TO CHOOSING THE BEST CREDIT CARD MACHINE

The checklist below will help you to select a credit card machine that best suits your business requirements:

- ☐ **Business Compatibility**: There are credit card machines that fit into various types of businesses. However, some are made for specific business type. Therefore, ensure the machine is compatible with your business type (e.g., retail, restaurant, online) and integrates with your existing systems.
- ☐ **Payment types**: Check if it accepts various payment methods such as chip cards, contactless payments, and mobile wallets like Apple Pay or Google Pay.
- ☐ **Fees**: Compare processing fees, including transaction fees, monthly fees, and any other charges.
- ☐ **Security**: Look for EMV compliance and PCI DSS certification to protect against fraud and ensure customer data security.
- ☐ **Ease of use**: Choose a user-friendly interface that your staff can quickly learn to operate.
- ☐ **Customer support**: Evaluate the quality and availability of customer support services provided by the provider.
- ☐ **Mobility**: Consider whether you need a stationary terminal or a mobile option for on-the-go payments.
- ☐ **Integration**: Check if the machine integrates seamlessly with your accounting or POS system for efficient transaction management.
- ☐ **Feedback**: Research the provider's reputation, including reviews and ratings from other businesses.
- ☐ **Customization**: Determine if the machine offers customization options to match your branding or specific business needs. However, this is optional.
